

Hiring Manager
Biosec Solutions
Abuja, Nigeria.

Dear Hiring Manager,

I'm excited to apply for the Quality Assurance Engineer role at Biosec Solutions. With hands-on experience in software testing, a keen eye for details others miss, and a genuine interest in the power of secure identity systems, I believe I'm a strong match for your mission to provide innovative biometric solutions across Africa.

In my role as a QA Analyst at Hasob Integrated, I was responsible for executing manual test cases, writing clear bug reports, and collaborating cross-functionally during sprints. I identified over 120 issues across multiple platforms and contributed to early-stage automation using Katalon Studio with Python. While I've worked in QA for just six months, my learning curve is sharp, and I'm comfortable taking ownership of quality outcomes in fast-paced environments.

What drew me to Biosec is your track record of delivering real impact through secure identity management, especially in our country Nigeria where authentication and trust are not just technical challenges, but national priorities. I'd be thrilled to contribute to a company solving problems that actually matter.

I've attached my resume for your consideration and would welcome the opportunity to learn more about your QA processes and how I can add value to the team.

Thank you for your time.

Sincerely,
Adaeze Nnonyelu.
